

Please reject NAB's petition 04-160. I'm sick and tired of how we promote mediocrity by passing laws to stifle progress. I pay for XM radio to get away from the drab and to enjoy 24/7 programming without being interrupted every few minutes by commercials. The traffic and weather is especially useful in my area because I can make adjustments in my 50 mile commute at a moments notice instead of waiting for regular radio traffic every 10-15 minutes. REJECT petition 04-160 and tell the NAB to get into the real world and upgrade their own stations.respectfully yours

Ira Yawnick
